

# Anaerobic Digestion Flow Chart

Waste Feed Material

Storage and any pre-treatment takes place initially

Digester

Biogas

Biogas Storage Vessel

Separator (eg Press)

Compressor

Biogas use as fuel

Liquor Storage

Fibre (to land or maturation)

Vehicle Fuel

Turbine/Generator

Gas Burner/Boiler

Transport use

Combined Heat and Power (Electricity)

Process heat for Digester, and/or space heating

Liquor may be marketable product. Depends on locality.
